Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1775

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 12-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language of claim 12 is confusing rendering the claims indefinite. It is unclear which layer contains the one or more elements selected from the group consisting of elements in Group 4A, 5A and 6a and Si in a proportion of 0.02 to 0.1 on a molar ratio basis.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5,7-10,12-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Inspektor (6,593,015).

The rejection is maintained for reasons in the previous rejection. Applicant's arguments filed 5/22/06 have been fully considered but they are not persuasive. The description of the intermixed layer in the reference clearly discloses that there is change in concentration of components within the layer and thus the rejection stands. .

5. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Doll (6,517,249)

The rejection is maintained for reasons in the previous rejection. Applicant's arguments filed 5/22/06 have been fully considered but they are not persuasive. The description of the "gradual transition" in the abstract suggests the claimed change in concentration of components within the layer and thus the rejection stands. .

6. Claims 1-5,7-10,12-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Fabian (DD 155826) or Inspektor (EP 0 892861).

The rejection is maintained for reasons in the previous rejection. Applicant's arguments filed 5/22/06 have been fully considered but they are not persuasive. The description of the mixed layer in the reference of DD 155826 suggests that is change in concentration of components within the layer and thus the rejection stands. Inspektor's figures suggests the claimed change through the layer and thus the rejection stand.

Art Unit: 1775

7. Claims 112-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Wantanbe et al (4,892,791) or Nissin Electric Co Ltd (JP 63-020446).

These references disclose the claimed boron nitride coating on a substrate through the claimed interlayers. Figures 8 and 1 in Wantanbe et al and Nissin Electric Co Ltd respectively clearly show the claimed gradation

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
